

**STRIVE**

warren blackwood inc

*To all those who wish to make a significant difference in their lives and the lives of others:*

The Dare To Dream person centred approach **program** with Deb Saville was an extremely engaging experience for the staff working with individual clients in a regional setting.

Deb managed to evoke awareness of the issues and provided an in depth insight into gathering evidence of individual goal outcomes.

Deb's concept of Vision Boards has provided the stepping stones to a quality person centred approach, well worth the investment

Throughout the process, Deb demonstrated professionalism by:

- Communicating the framework and expectations of the presentation and engaging all participants in all aspects of the training.
- Managing the process through consultation with our agency and delivering a hugely positive and polished training experience.
- Helping us to find our own solutions
- Demonstrating a passion and enthusiasm that was infectious

As a result, the benefits have been:

- Tools for support
- Mechanisms for gathering evidence
- A marked increase in staff motivation
- Overall goal setting direction
- New initiatives

I strongly recommend Deb's programs to anyone who has a desire to develop person centered services to people with a disability.

Truly inspirational and life changing!!

Yours Sincerely

Peter Seaward
