““ REVIEW:

The Adventures of Charlie & Moon is charming! I can't wait to have it in the store to hand sell it. It will appeal to a wide range of children but should be especially welcome to younger fans of the *Harry Potter* books. It has the classic feel and lovely language of Tolkien but with plenty of contemporary bits. I particularly liked the wonderfully flowery descriptions of people and places. The 'English-ness' might have turned off some readers before *Harry Potter* but now even the youngest kids know what 'cream buns' and 'waistcoats' are. I also love that the violence is kept low key & somewhat cartoon-y.
